Hawaii Revised Statutes 327H-1 – Pain patient’s bill of rights; findings

Current as of: 2019 | [Check for updates](#) | [Other versions](#)

[327H-1] Pain patient’s bill of rights; findings. The legislature finds that:

- (1) Inadequate treatment of severe acute pain and severe chronic pain originating from cancer or noncancerous conditions is a significant health problem;
- (2) For some patients, pain management is the single most important treatment a physician can provide;
- (3) A patient who suffers from severe acute pain or severe chronic pain should have access to proper treatment of pain;
- (4) Due to the complexity of their problem, severe acute pain or severe chronic pain may require referral to a multidisciplinary team. Severe acute pain and severe chronic pain is best treated by a team of clinicians addressing medical, psychological, social, and vocational issues;

(5) In the hands of knowledgeable, ethical, and experienced pain management practitioners, opiates administered for severe acute pain or severe chronic pain can be safe; and

(6) Opiates may be part of an overall treatment plan for a patient in severe acute pain or severe chronic pain who has not obtained relief from any other means of treatment.
